BATA Next Wave

Transit Master Plan

Executive Summary | October 2022

About The Project

BATA Next Wave is a Transit Master Plan (TMP) that will guide the agency's priorities for the next five to ten years. The goal of this plan was to identify how best to use the agency's resources to maximize the benefits that transit can bring to our community.

The plan evaluated our region's transit demand and growth opportunities to make recommendations based on BATA's guiding principles, stakeholder and community input, and data analyses.

BATA is prepared to take on future challenges and improve transportation options, helping our community's residents become better connected to jobs, services, and educational opportunities.

Project Timeline

Project Kick-Off March 2022

> State of the System Report April-May 2022

Public & Stakeholder **Engagement** May 2022

BATA strives to meet the changing needs of transit riders in our community. Grand Traverse and Leelanau counties are growing, the region has cemented itself as a premier tourism destination in northern Michigan, and recovery from the COVID-19 pandemic have led to shifts in how people travel. Now is a key time for BATA to evaluate goals and plans to develop a plan for the future.

In the last five years, BATA has increased ridership, launched a high-frequent farefree Bayline service, upgraded tourism-based services, developed a mobile-ticketing program, improved rural door-to-door service, created the Link On-Demand service, and is close to starting construction on a new transit facility. BATA Next Wave builds on these successes to develop guiding principles and implementable goals for the agency for the next 5 to 10 years.

Continued Engagement **Board Approval** July-August 2022 October 2022

Millage Vote November 2022

Market Analysis

Understanding the underlying patterns of transit demand in BATA's service area was an important part of developing the plan. The market analysis used demographic, environmental, and economic data to provide an overview of where current and potential transit riders live, work, and travel. Findings highlight where transit service will be most effective and will help BATA invest in high-quality services that will continue to be successful and beneficial to the community.

Transit Demand is strongly driven by...

Employment Density

Development **Patterns**

Activity Centers

Travel Patterns

Visitors & **Tourism**

and/or microtransit

Transit Assessment

The Next Wave planning process included an inventory and detailed analysis of BATA's six different service types and a variety of performance metrics. Each of the services described below is tailored to the needs of different areas of the community. Close attention was paid to the changes before and during the COVID-19 pandemic, which impacted the ability for BATA to provide service.

Bayline

Free, frequent bus service operating in the busiest parts of Traverse City.

Every 15-20 min

City Loop

Local bus service operating in and around Traverse City.

Every 30 minutes

Village Loop

Regional bus service connecting to villages and townships in Grand Traverse and Leelanau counties.

Every 60+ minutes

Seasonal

Special seasonal and festival services like Ski n Ride, Bike n Ride, Cherry Festival Shuttle, etc.

Varies

Link On-Demand

On-demand, app-based ridehailing service like

On Demand up to 1 day in advance

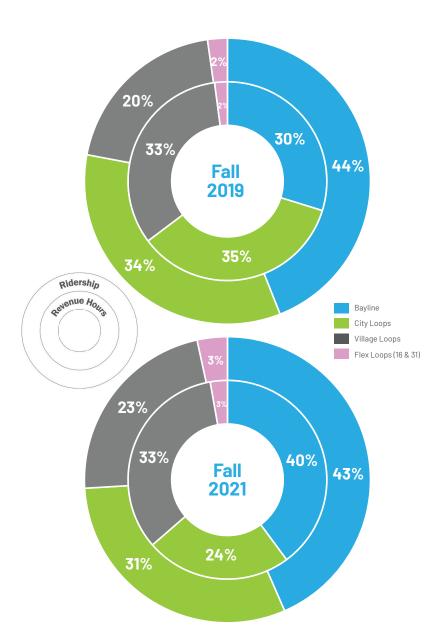

Village Link

Demand response service operating in Grand Traverse and Leelanau counties outside of Traverse City.

Dial-a-Ride up to 1 week in advance

Ridership vs Revenue Hours

Comparing ridership to revenue hours shows how productive a service is compared to the resources spent on providing it. In both 2019 and 2021, Village Loops had disproportionately lower ridership compared to hours, while City Loops and the Bayline carried more riders compared to hours.

Engagement Efforts

Public Input

To guide the BATA Next Wave, we completed an initial round of public engagement. We asked the community to take a survey about their preferences and experience with transit in the region. Over 250 people completed the survey both online and in person at multiple public outreach popups at the Hall Street Transit Center, a senior center, and local farmer's markets. The survey was also advertised on the agency's website, on social media, and in the Ticker.

A second round of public engagement was conducted to obtain feedback on the drafted recommendations. A project website detailing the analysis and draft recommendations was created for the public to learn about the plan and provide input.

Stakeholder Meetings

BATA also held two virtual stakeholder engagement meetings to ensure the plan would support and build off of other local initiatives. Stakeholders who participated in these meetings represented a variety of organizations including City of Traverse City Planning Department, Networks Northwest, Groundworks, Traverse Area District Library, and Benzie Bus.

Some of what we heard...

"I'd love to use the know how to put together routes to places I might want to go on one trip away from home."

"BATA is my only form of transportation and I rely on it for work, shopping and socializing with peers."

bus more, but I don't

"I really enjoy the Bayline but was disappointed when it stopped running on weekends. I understand why but it was super helpful to have those days."

Prioritizing BATA Service Improvements

Improve frequency so buses come more often Operate service for more hours of the day Add service to a new area or between different areas 14% Make service easier to understand Improve service on the weekends 13% Make bus routes more direct Improve communication of services and technology Reduce the cost to ride

Buses running more often on main streets, with a longer walk to bus stops

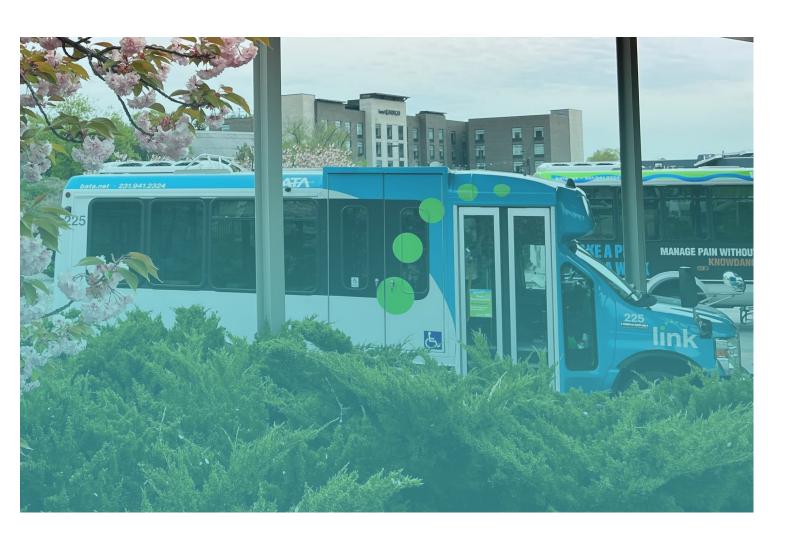

60% preferred

- OR -

Buses running on more streets, but less often and with a shorter walk to bus stops

40% preferred

What does the plan accomplish?

Improved Frequency
More 15- and 30-minute
service
Village Loop routes return
to 60-min service

Better Crosstown Connections

Proposed new east-to-west crosstown route

2

Including the airport, the new BATA transit center, and the east side of town

4

(3)

Reliable Village Connections

With Village Link On Demand and consolidated Link to Loop connection points

5

Optimize Service to Use Funding Efficiently

Developing Recommendations

Using the results from the data analysis and public involvement efforts, BATA Next Wave identified three focus areas to guide the recommendations in the plan. These goals define some of the strategies BATA uses to make transit more accessible, convenient, and useful to more of the community.

Service Levels

Improve transit service in a productive and cost-efficient way.

Strengthen connections to key destinations.

Coordinate fixed route services with demand response and microtransit services.

Reliability

Provide sufficient recovery for fixed routes to remain on-schedule.

Establish sufficient service spans and frequencies.

Create a service schedule with no more than 3 changes per year.

Clarity

Consolidate services categories and coordinate associated fares.

Create simple route and schedule pamphlets to support rider trip planning.

BATA Next Wave

5-Year Recommendations

Frequency Improvements

Restore Bayline to 15-minute frequencies and extend to Grand Traverse Mall area

Restore Routes 1 and 2 to 30-minute frequencies on weekdays

Restore all Village Loop (not including Routes 16 and 31) routes to regular 60-minute frequencies

Weekend Service Increases

Provide Saturday service on all City Loop routes

Provide Sunday service on Bayline, Routes 1 and 2

New Route

Implement new crosstown service (Route 5) at 30-minute service

Village Loop Changes

Shorten outer ends-of-lines on most Village Loop routes, and enhance Village Link On-Demand service with designated connection points to Village Loop routes

Start and end Routes 12 and 13 at Grand Traverse Mall area where they will connect to frequent City Loop service

Start and end Route 14 near Munson Medical Center where it will connect to Bayline

10-Year Recommendations

Frequency and Span Improvements

Increase Route 2 to 15-minute frequencies on weekdays

Increase Routes 1 and 2 to 30-minute frequencies on Saturdays

Expand Route 16 to all-day service

Provide Saturday service on all Village Loop routes

New and Extended Routes

Westside service (Route 4)

Eighth Street crosstown service

Extend Route 14 to Grand Traverse Mall area via Airport Road

Potential New Transit Hub

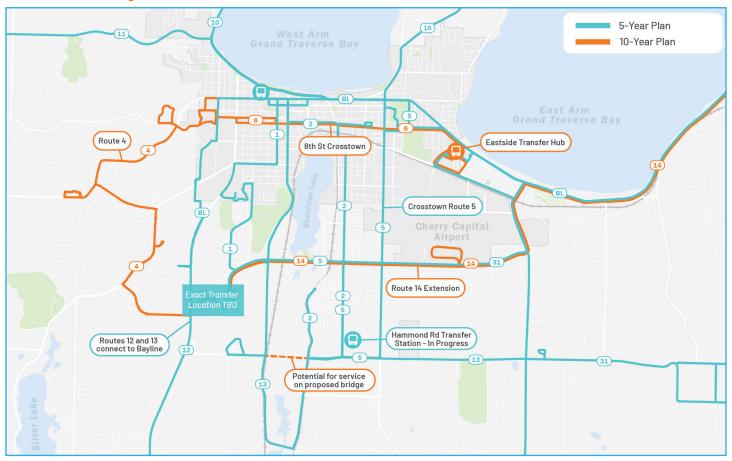

Eastside near Tom's

Other Potential Considerations

Hartman-Hammond Bridge

Intercity train service to Traverse City

Traverse City

Grand Traverse & Leelanau Counties
